Introduction:

The project aims to analyze the personal job application data gathered over 3 months, capturing the important parameters including company name, job post, job type, location, required skills, compensation (CTC), Applied Through, Applied date, and additional comments. With a dataset comprising 278 entries, this analysis provides valuable insights into individual job search trends and strategies.

***Note:** This data is exclusively collected from my personal job applications. Any external usage should include a proper citation.*

Steps

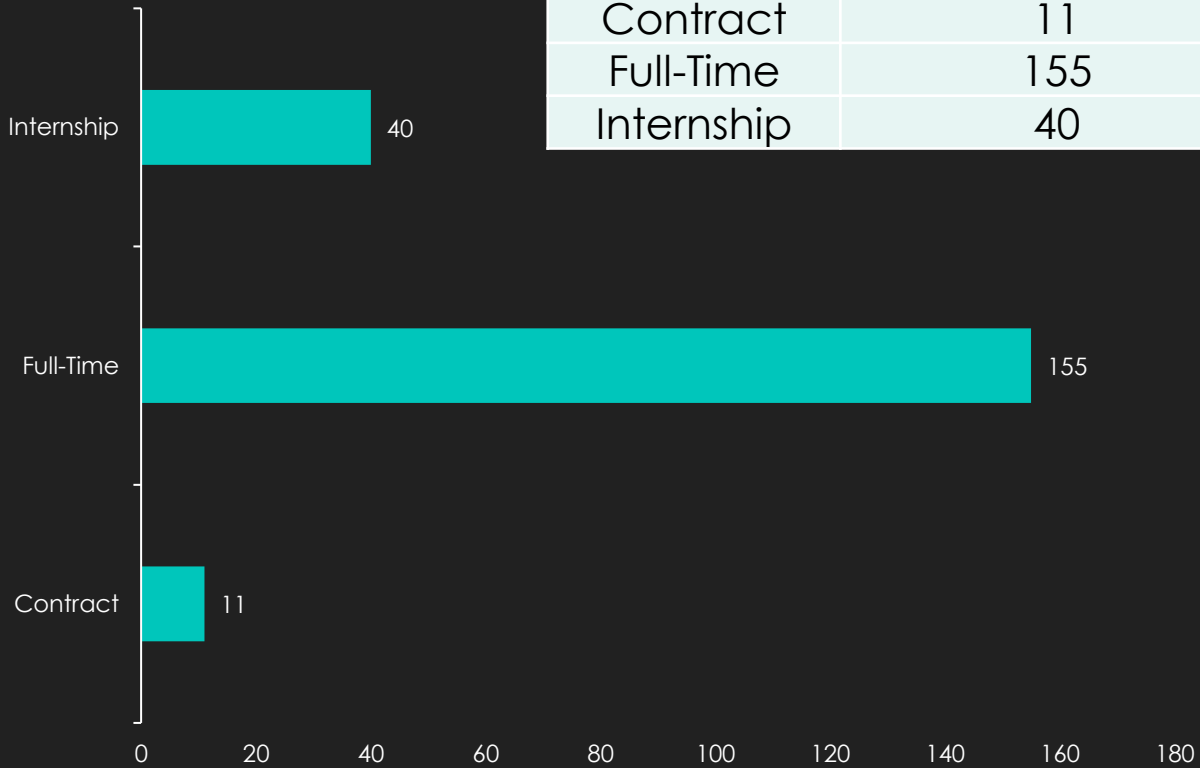

- Data cleaning & Processing
 - Remove missing values or fill with the most frequent values depending on the situation
 - Drop the un-important columns
 - Process the columns parameter and clean & process the variable for ease of implication.
- Exploratory data analysis (EDA)
 - Perform exploratory data analysis to uncover insights and patterns in the data.
 - Visualize key findings using charts and graphs to effectively communicate insights.

Applied Job Role

The data was visualized using both Python and Excel, and the results were compared.

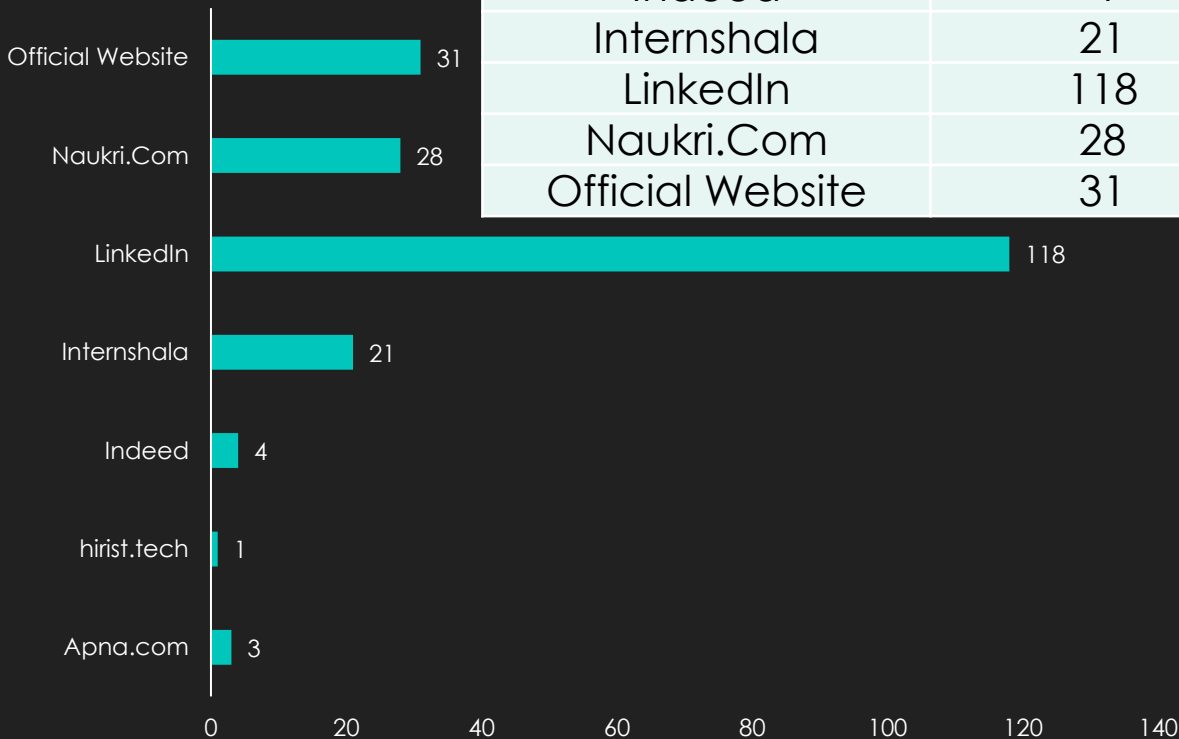

Applied Job Type

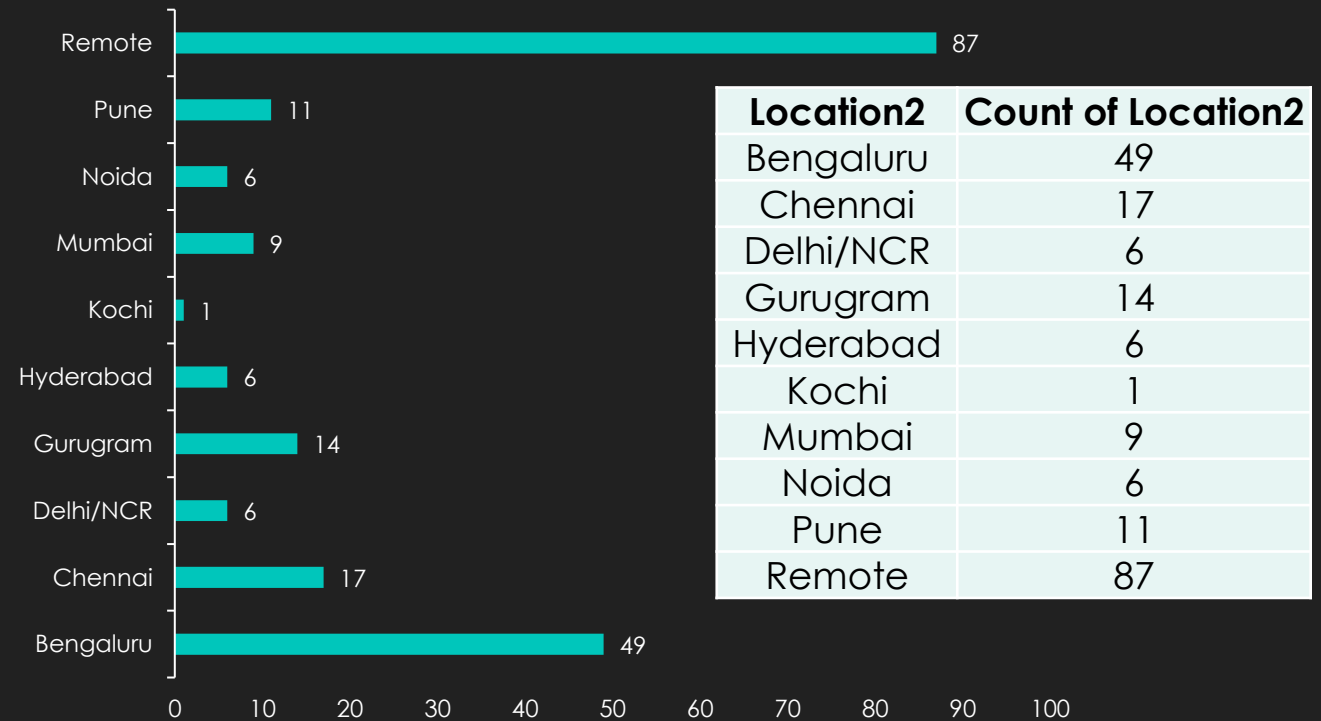

Role_Type	Count of Role_Type
Contract	11
Full-Time	155
Internship	40

Applied Through

AppliedThrough2	Count
Apna.com	3
hrist.tech	1
Indeed	4
Internshala	21
LinkedIn	118
Naukri.Com	28
Official Website	31

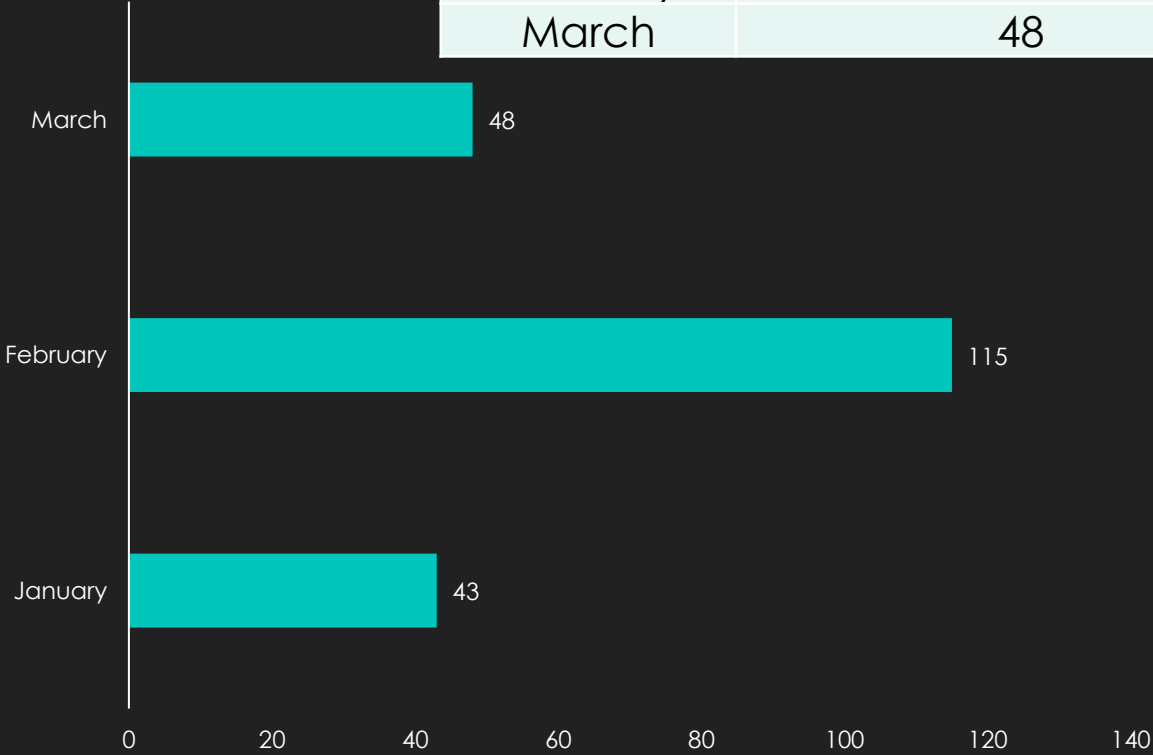

Applied Location

Month wise job applied

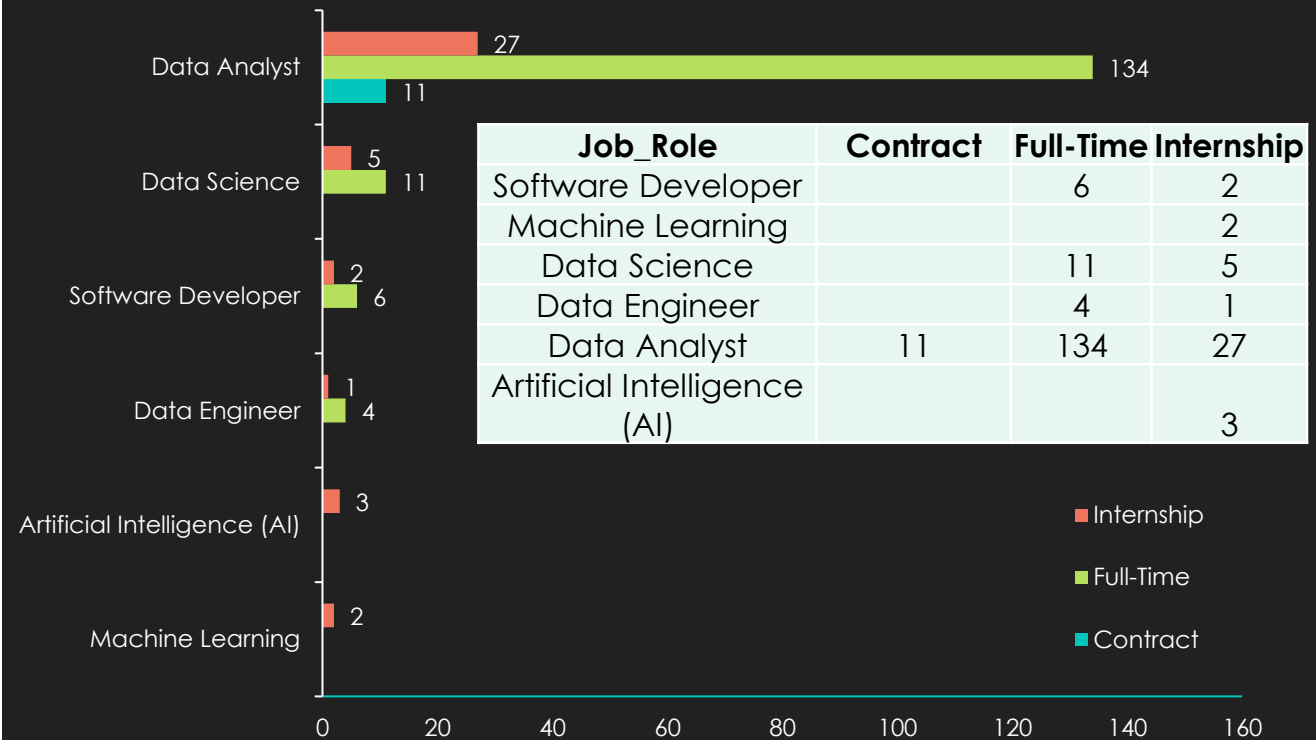

Month_Name	Count of Month_Name
January	43
February	115
March	48

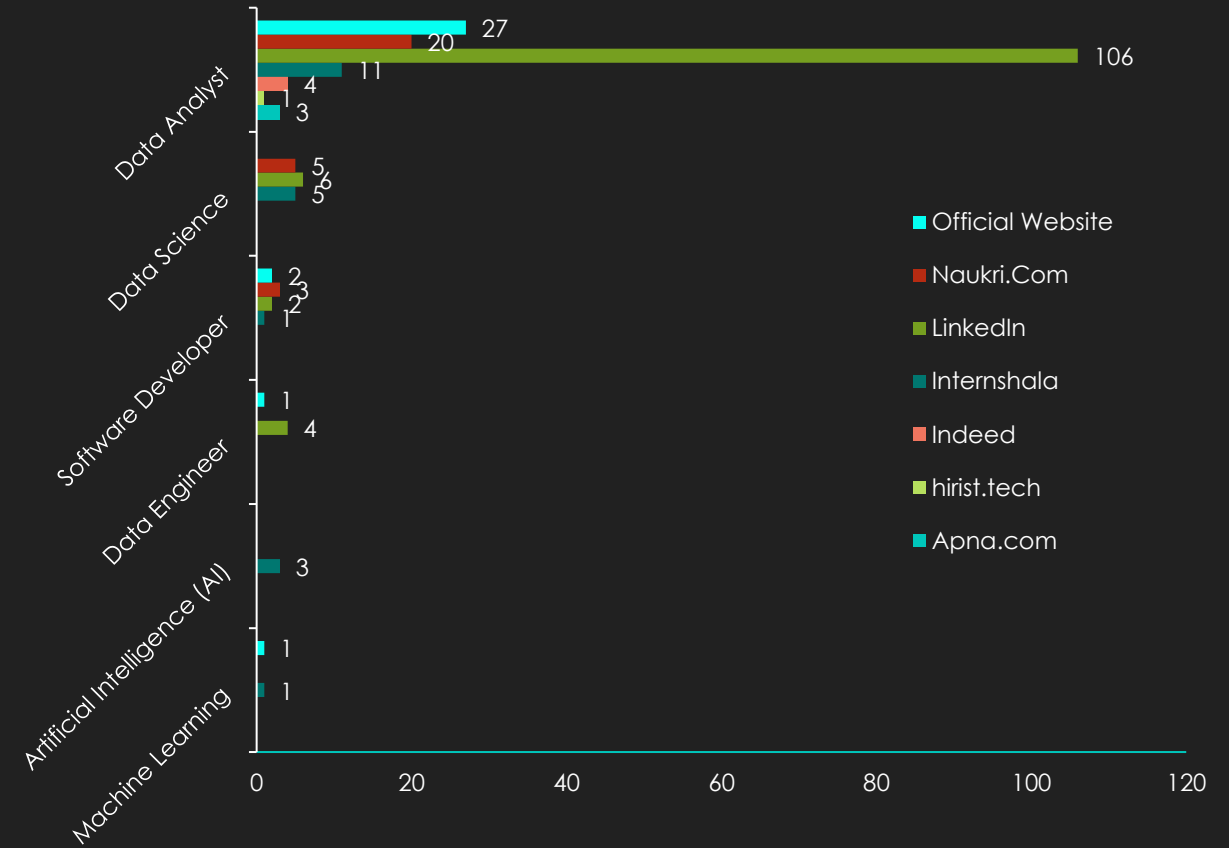

Bi-variate categorical analysis

- Bivariate categorical analysis involves analyzing the relationship between two categorical variables.
- Bivariate analysis allows us to explore how the categories of one variable relate to the categories of another variable.

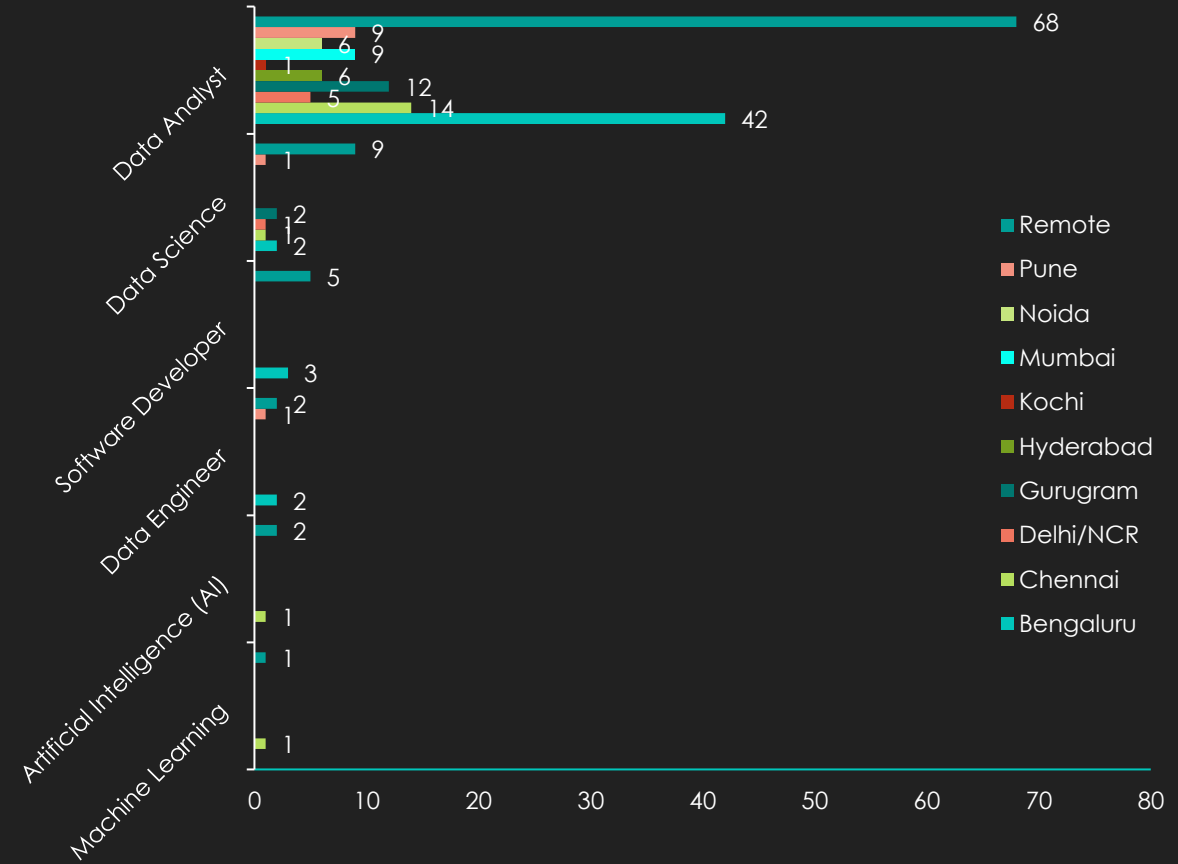

Applied Job role vs Job type

Applied Job role vs Applied through

Applied Job role vs Location

Applied Job role vs Applied month

Important Parameters Analysis:

○ Top 5 applied companies

```
Innometrics Solutions    4
BayOne Solutions         4
Rekruton Technologies   4
Elite Met Solutions      3
Bytical                  2
Name: CompanyName, dtype: int64
```

○ Most applied Job Role

```
Data Analyst    172
Name: Job_Role, dtype: int64
```

○ Top 3 Job Location

```
REMOTE    86
BENGALURU 48
CHENNAI   17
Name: Location, dtype: int64
```

○ Most Applied Job Type

```
Full-Time    155
Name: Type, dtype: int64
```

○ Most jobs applied in the month of?

```
February    115
Name: month, dtype: int64
```

○ Top 3 platform jobs applied through?

```
LinkedIn    118
Official Website    31
Naukri.Com    28
Name: AppliedThrough, dtype: int64
```
